BioWorld Wastewater Treatment, Odor Neutralizer and Foggers for Mobile Villages, RV Parks and Campgrounds

Benefits when using BioWorld Wastewater Treatment:

- Customized evaluation.
- Specially designed treatment plan.
- Outstanding customer follow up.
- Absolutely the most powerful treatment available.
- Completely degrades and digests all waste.
- Restores clogged drain lines and leach fields.
- Avoid or delay costly pumping.
- Overcome today's harsh wastewater.
- Easy to use.
- Sewage smells and odors are eliminated.
- Environmentally safe and natural.
- Will save you money by maintaining your system and avoiding mechanical problems.

Mobile Village (R.C. from California) Customer comment: "The BioWorld Wastewater product works great! It has saved me a lot of money by having to pump less or not at all. The water coming from the leach field is very clear!"

BioWorld Wastewater Treatment is the most effective product on the market to maintain a healthy functioning wastewater collection and treatment system. Our environmentally safe "green" product was originally developed for industrial and large scale municipal treatment facilities and is now available for home and small business septic and wastewater systems. BioWorld will maintain your wastewater system and save you money from costly pumping and/or plumbing problems.

Why is BioWorld Wastewater Treatment better than liquid enzymes and microbes alone? Enzymes are catalysts for chemical reactions and do not reproduce. Microbes in a liquid have a limited useful life and rapidly become ineffective. BioWorld's 2-part enhancement and augmentation product maximizes the ability of the microbes to reproduce and creates an enzyme factory in the waste environment.

Advanced BioTech

Developer of BioWorld Products

BioWorld Wastewater Treatment is formulated to break down today's complex waste including solids, grease, fats, oils, foods, anti-bacterial soaps, detergents, bleaches, fluoride toothpaste, toilet bowl and other cleaning products.

Simply add BioWorld Wastewater Treatment once or twice per month to maintain your wastewater system, keep drain lines and drain fields functioning properly and free of problems.

When odors become an issue from system back up, use BioWorld Liquid Optimizer Plus, BioWorld Odor Neutralizer and foggers to eliminate odors on contact.

BioWorld Liquid Optimizer Plus is a unique **concentrate** bioenhancement liquid with added odor neutralizing compounds. Diluted Liquid Optimizer Plus can be sprayed directly onto organic matter in dumpsters, vault toilets and trash cans to help accelerate the degradation process while minimizing odors in the process. Liquid Optimizer Plus can be applied to areas affected by sewage back up to degrade waste and eliminate odors.

BioWorld Odor Neutralizer (BON Concentrate) is a completely safe and natural liquid formulation that eliminates offensive odors at the source. While many products only mask odors with strong scents, BON neutralizes unpleasant odors making them undetectable to our sense of smell. BON can be appropriately diluted (2 – 10%) and fogged into the air or ventilation system using a Triple Nozzle Fogger, Noz-L-Jet Fogger, drum mounted fogger or industrial misting system. Any fogger can be set up with a repeat cycle timer to automate the frequency and duration of the odor neutralizer application.

BON can be added to solutions or used to clean and eliminate odors from:

- Counter tops/tables
- Food spills
- Trash cans
- Bathroom areas
- Paints, solvents, chemicals and cleaners
- Carpets and upholstery
