BioWorld can assist in the cleanup effort by supplying unique and specialized bioremediation technology solutions for environmental cleanup of oily residues in waterways and along shorelines.

Type of Service or Product Offered: Specialized Items

Hydrocarbon, oil spill and hazardous waste cleanup products/equipment Oil and waste cleanup of petroleum hydrocarbons.

BioWorld is prepared to rapidly provide our specialized products, application equipment and services with costs based on quantity ordered and contract length.

BioWorld has adapted procedures to rapidly assist in large scale environmental cleanup projects anywhere around the globe, such as tanker oil spills and other chemical disasters.

Founded in 1991, BioWorld combines numerous capabilities for large scale cleanup projects in our Environmental Company including Products, Equipment, Services and Engineering. We are prepared to apply our products to waterways, shorelines and other areas for cleanup using the "**Best Available Technology**".

BioWorld will save a tremendous amount of time and money in the oil cleanup effort and help return the ecosystem to its pristine condition.
