ODOR CONTROL TECHNOLOGY For Carpet/Upholstery Cleaning

Harsh odors can be a problem when trapped in carpets, upholstery, fine rugs and drapes. BioWorld's Odor Control Technology is the answer to resolve these persistent odor issues. By using BON, it is possible to restore an odor polluted rug to its potential market value. Let BioWorld help you resolve these issues for your clientele with our **concentrated** odor neutralizers, foggers and accessories.

BioWorld Odor Neutralizer (BON) is absolutely the best product available for neutralizing odors. **BON is a completely safe and natural** liquid formulation that eliminates offensive odors at the source. While many products only mask odors with strong scents, the BON technology neutralizes unpleasant odors making them undetectable to our sense of smell. BON can be appropriately diluted (2 – 10%) and sprayed directly onto the carpet/upholstery using a pump sprayer. Add BON to carpet/upholstery shampoo and clean according to manufacturers directions.

BON can be added to solutions or used to clean and resolve many types of odor problems:

- Counter tops/tables
- Food spills
- Trash cans
- Bathroom areas
- BON can be added to paints, solvents, cleaners and chemicals to eliminate harsh odors when maintenance, roofing, and flooring repair work is implemented.
- BON is used as a key component in a **low odor, low VOC** paint which received Green Seal Certification.

Other BioWorld clients have successfully used BON-CC-41 for resolving odor problems in carpets and upholstery. Repeat cycle timers, turntables and customized misting systems are also available.
