CORPSE DECOMPOSITION CASE STUDY

Project Situation

A real estate owner/landlord in California discovered one of his renters died in his home and laid there for about 2 weeks. The odor was very severe throughout the entire home and under the house. The owner tried several different products to eliminate the odor from the home without any success. After contacting BioWorld, he purchased the BioWorld Odor Neutralizer (BON-CC-41) and BioWorld Triple Nozzle Fogger to fog the BON-CC-41 throughout the home.

Products/Technology Used

#41064 BioWorld Odor Neutralizer BON-CC-41 Concentrate
#F8026 BioWorld Triple Nozzle Fogger

Results

After two applications throughout the home and under the house, the odors were completely eliminated. Now the rental property could be occupied once again. The BON-CC-41 worked so well for our client that he will be using the BON for all his odor issues in the future.
