ODOR CONTROL TECHNOLOGY For Fitness Center/Gyms

Fitness Centers have clients coming in and out every day for their work outs. Fitness Centers are expected to maintain a safe and healthy environment for clients. When odors appear, a quick response is essential. Let BioWorld help maintain a pleasant environment with our **concentrated** odor neutralizers, foggers and accessories.

BioWorld Odor Neutralizer Concentrate (BON) is absolutely the best product available for neutralizing odors. BON is a completely safe and natural liquid formulation that eliminates offensive odors at the source. While many products only mask odors with strong scents, the BON technology neutralizes unpleasant odors making them undetectable to our sense of smell. BON can be appropriately diluted (2 – 10%) and fogged into the air or ventilation system using a Triple Nozzle Fogger, Noz-L-Jet Fogger, drum mounted fogger or industrial misting system. Use BON to fog or spray inside facilities to control odors or use BON to wipe down exercise equipment. BON and BioWorld Liquid Optimizer Plus can be used to control trash can and dumpster odors.

Other clients have successfully used a Triple Nozzle Fogger and BON-CC-41 for athletic building odors, chemical odors and other major odor problems. A Noz-L-Jet Fogger has been used with water based pesticides/disinfectants to eradicate fungus and ringworm. Repeat cycle timers, turntables and customized misting systems are also available.

BioWorld Liquid Optimizer Plus is a unique **concentrate** bioenhancement liquid with added odor neutralizing compounds. Diluted Liquid Optimizer Plus can be sprayed directly onto organic matter in dumpsters and trash cans to help accelerate the degradation process while minimizing odors in the process.

BioWorld Advantages

- Unpleasant odors - making them undetectable Special
- formulation available with disinfectant added to help sanitize air and surfaces.
- Eliminate odors from workout room, locker rooms, offices, bathrooms, kitchens, lunch rooms, dumpsters, trash cans.
- Add Bon to shampoo and clean carpets and upholstery..
- BON can be added to paints, solvents, cleaners and chemicals to eliminate harsh odors when maintenance, roofing, and flooring repair work is implemented.
-

Advanced BioTech

Developer of MultiFIX™ and BioWorld Products™

BON is used as a key component in a **low odor, low VOC** paint which received Green Seal Certification.

- Environmentally safe, economical and easy to use.
- Cost effective – BON is concentrated which provides you with more product for your money.
- Equipment available for many applications for small, medium or large scale projects including custom designed industrial fogging systems.

Industrial and Commercial Applications – Foggers and BON
